

## PayFabric Website Content

The content below can be used on your website to promote your new PayFabric integration.

1. Choose the content that best suits the features that you have made available to your customers through PayFabric.
2. Add your company details within the brackets. []
3. Remove all content in red.

### PayFabric

PayFabric is a simple, flexible and secure payment processing platform that enables businesses of all sizes to accept electronic payments.

With PayFabric, businesses can process credit card and ACH transactions directly from within [insert your product/platform name].

[Optional: Insert screenshots of PayFabric within your application]

### Features and Highlights

#### Hosted Payment Page

Obtain a true, no-touch payment acceptance process with PayFabric's hosted screens that capture and store payment data in the cloud rather than your servers.

#### Payment Links

Send secure hyperlinks to customers for submitting quick payments without the need to log in.

#### Highest Level of Security

Process payments with PayFabric, a PCI Level 1 compliant solution that reduces the complexity and cost of maintaining PCI compliance.

#### Level 2/3 Transaction Support

Receive lower payment processing rates by sending full transaction details to the payment processor.

#### Point-to-Point Encryption (P2PE)

Add additional protection for point of entry with point-to-point encryption (P2PE) via a hardware encryption device.

#### Seamless Integration

Process secure transactions directly from [insert your product name] to eliminate manual data entry and decrease delays with disconnected systems.

**Note: Only include 'Surcharge' if you have completed the support for surcharge within your platform.**

#### Surcharge

Add an additional fee to credit card transactions to offset your cost of accepting credit card

payments.

***Note: Only include the following sections if you have integrated with PayFabric Receivables***

**Invoice Notifications**

Send automatically triggered invoice notifications and payment receipts to your customers.

**Payment Reminders**

Send customers automatic email reminders for upcoming and past due invoices.

**Automatic Payments**

Offer your customers the ability to sign up for automated recurring payments with flexible scheduling options.

**Customer Payment Portal**

Offer your customers access to a self-service payment portal where they can view and pay their invoices online.
